

Teja Jetti

FULL-STACK DEVELOPER · AI ENTHUSIAST · CSE (AI) STUDENT

+91 9491256991 | sivatejajetti@gmail.com
Peddapuram, Kakinada, Andhra Pradesh, India
github.com/sivatejajetti | tejajetti.vercel.app | linkedin.com/in/teja-jetti

Motivated first-year CSE (AI) student with hands-on experience building and deploying full-stack web applications using React, Node.js, and Supabase. Developed **3 production-ready projects** including an AI-powered fitness platform live at vitalme.vercel.app. Skilled in REST API integration, Google OAuth, cloud deployment (Vercel & Render), and AI-assisted development workflows. Competed in **4 hackathons**, securing 2nd place — driven to ship real-world products from day one.

PROJECTS

VitalMe FLAGSHIP

React · Node.js · Supabase · Vercel · Render

- Architected and deployed a **full-stack AI fitness platform** featuring heart rate monitoring, step tracking, and interactive analytics dashboard — live in production.
- Integrated **Google OAuth** for secure authentication and engineered a RESTful Node.js backend hosted on Render with React frontend on Vercel (both free tier).
- Built an **AI-powered push-up counter** using MediaPipe Pose: real-time skeleton overlay, elbow-angle state machine for rep detection, voice alerts via Web Speech API, and auto-logging to a Goals page.
- Embedded a **Claude AI chatbot** to provide personalized health insights and coaching based on logged fitness data.

College Management System

Node.js · Face Recognition · Geofencing

- Built a **smart attendance platform** combining facial recognition and GPS geofencing for real-time, location-verified check-ins — reducing manual tracking overhead.
- Developed integrated student & teacher **feedback portals** and a resource-sharing hub to centralise institutional workflows.

Mr. Cypher - Phishing Detection AI

Node.js · Machine Learning · Random Forest

- Engineered an **ML-powered phishing website classifier** using a Random Forest model; performs real-time URL analysis for threat identification and malicious-site flagging.
- Designed an end-to-end pipeline covering feature extraction, model training, and a Node.js inference API with a user-facing classification interface.

HACKATHONS & ACTIVITIES

- Competed in **4 hackathons**; secured **2nd Place** in a competitive coding challenge, demonstrating ability to build and present under time constraints.
- Completed **EduSkills Ethical Hacking Virtual Internship** — hands-on exposure to penetration testing and web vulnerability assessment.
- Completed **Microsoft Learning Path certifications** covering cloud fundamentals and developer tools.
- Active GitHub contributor — multiple repositories showcasing full-stack and ML projects with deployment configurations.

EDUCATION

B.Tech - CSE (Artificial Intelligence)

Pydah College of Engineering

2024 - 2028 (Expected)

CGPA 7.41

TECHNICAL SKILLS

LANGUAGES

JavaScript

C

SQL

FRONTEND

React

HTML5

CSS3

BACKEND & DB

Node.js

REST APIs

Supabase

AUTH & SECURITY

Google OAuth

JWT

DEPLOYMENT & TOOLS

Vercel

AI Dev (Claude)

CERTIFICATIONS

- Microsoft Learning Paths
- EduSkills Ethical Hacking Virtual Internship

ACHIEVEMENTS

- 2nd Place** - Hackathon Competition
- Participated in **4 Hackathons**
- Deployed **3+ production apps** as a 1st-year student
- Built live AI fitness platform with real user-facing features
